

Tufloc X-Lock Vertical Partition Mount Vehicle Gun Rack

Product Text

Tufloc's X-Lock Vertical Partition-Mount Gun Rack gives law enforcement officers quick, easy, one-handed access to weapons - when they are needed quickly. The innovative, patented design features locking arms that automatically adjust for a tight, secure fit when the gun is pressed into place.

- Stainless steel, spring-action locking arms allow for one-handed removal of the gun.
- Padding protects guns and prevents rattling.
- Self-adjusting arms ratchet to secure most guns tightly.
- The lock can be opened with an electronic timer or with a key.
- Lock can be adjusted along the backplate to custom fit each make/model of gun.
- Quick installation - the rack can be mounted with little or no drilling.

The X-Lock Vertical Gun Rack is available in single and dual-gun configurations. Each rack ships configured for a specific make and model of gun.

What's Included

- X-Lock Lock Head(s)
- Electronic release timer
- Padded butt pocket
- Mounting hardware
- Step-by-step installation instructions

Recommendations

There are four variables for this product:

1. Configuration (dual or single gun)
2. First gun type (driver side for dual racks)
3. Second gun type (passenger side for dual racks)
4. Key type (handcuff or tubular)

Please see the included Excel file for a listing of common variations and the applicable part numbers. This file is provided to make it easier to import the data into an e-commerce platform. The “Other Gun Type / Custom Config” option should ideally enable a text field where the user can enter details

Tufloc recommends listing a single product listing with available options for selecting the right variation. An alternative would be two product listings – one for the single gun rack, one for the dual gun rack. Please refer to <https://tufloc.com/vehicle-gun-racks/x-lock-vertical-gun-rack> as an example.
